It is a well known fact that Dyspepsic and Indigestion are the causes of nearly all the diseases that the human body is heir to; then why pay enormous doctor's bills? By using Dr. Henley's celebrated I X L Bitters they can be thoroughly eradicated from the system and new life imparted to the sufferer. Read adver-tisement in another column.

H. M. BARNES, Notary Public, and Commissioner of Deeds for California and Utah. General business and real estate agent. Collections made at reasonable rates and proceeds promptly remitted.

Office: Next door to the Postoffice, La-

WE would call the attention of our readers to the advertisement in another column of the Brooks Sewing Machine Co., of New York; they advertise, what is indeed a valuable invention, a first-class sewing machine for five dollars.

Jesse Beene has again opened business in the store jointly occupied by himself and Mr. Cavallier, the well-known stockbroker on Main street. His complete stock of drugs, medicines, chemicals, etc., are entirely new. Prices always moderate. Give him a call.

LAND OFFICE BUSINESS.-During my absence land office business connected prosecuted. with lands in Southeastern Nevada, both tate, will be to by Joseph C. Benner of the County Recorder. H. N. Maguine. to by Joseph C. Henderson, at the office

On Sunday next, June 22d, S. C. Barnes will have for sale at Boone & Dolman's corral, forty head of fine saddle and buggy horses. This is the last chance. All that are not sold will be sent away to ranch. je21-3t*

JEWELLY. - Wm. Manning has removed his jewelery store to opposite Mendow Valley street. His stock of jewelry is large, and prices reasonable.

A NEW circulating library, imported ci-

gars, tobacco, stationery and confectionery at J. Levin & Co.'s, opposite Hamilton's saloon, Main street. Wilson & Solomon, dealers in cigars

and stationery, at Fulks & McAlpin's. Collecting done by W. R. Wilson. PIONEER NEWS DEPOT, Main street-C.

Go 70 Alexanders' for your drugs.

LOCAL MINING REVIEW. For the Week Ending June 22, 1873. We have no remarkable discovery in any of the mines of Ely district to chron-

icle this week - no rich strike that eclipses all its predecessors, and throws the far-famed Eberhardt into the shadebut we have to report, what to the practical miner-to the mining speculators and investors of the Pacific coast-men who are almost as well versed in what constitutes a mine as the miners who drive the levels and sink the shafts, (as indeed, many of them have done themselves in days gone by,) and to all calm, reflecting men in our midst-that there is a steady improvement in all the mines in the district, that have been opened beyond the mere prospecting stage-that there is more ore in sight to-day than ever before - that enormous quantities are being raised to the surface, and much more could, and will be, as facilities for hoisting rapidly, increase—and, finally that all our mills are running on full the mills at Bullionville, and en route, afforded by the completion of the Nevada Central, or, as it is familiarly termed, the Pioche and Bullionville Railroad, is another source of gratulation to our citizens, who see in the cheap movement of our ores, (thereby rendering it possible to work those of a low grade, which always constitute the great body of the ores of every camp,) the surest endorsement of our permanency as a bullion producing district.

We embrace in our mining review today, some interesting facts concerning some of the mines of Bristol and Highland districts, giving the names of our informants, and shall always be pleased to receive information as to the progress mines in adjacent districts. with the name of the author, in time to incorporate in the review. Ely district is not jealous of its sisters. Its fame rests on the assured foundation of success, and the owners of the mines within its borders, while believing they can never be excelled in productiveness and wealth, are willing to concede that they may, and very likely will be, equalled. And to this conclusion, we ourselves could not very well help arriving, after making an examination of some very beautiful specimens of ore brought in from Bristol district by our fellow-citizen Louis Sultan, mine. of the firm of Jacobs and Sultan of

Pioche. AMERICAN PLAG. The recent developments in the American Flag mine, at the depth of 625 feet from the surface, still continue to imfrom the surface, still continue to improve in character. The vein matter at this point is the full width of the shaft, the ore body being two feet wide. The number of hands employed throughout the mine is fifty-two. The stopes are yielding the same amount of ore to the number of men employed as heretofore. The mine is being prospected as rapidly as possible. Ore is being shipped daily to the Amador mill, which is doing good work. This mill claims to work ores to as high a per centage as any mill in the as high a per centage as any mill in the District, and we see no reason to doubt their assertion, as their facilities for doing so are unexcelled.

The Portsmouth mine is situated between the Alps and Montana, in a huge mass of croppings, the exact coun-terpart of those in which the main shafts of the Excelsior and La Paz mines are sunk. It is owned by Messrs. Williams, Bell & Co. A perpendicular shaft has been sunk to the depth of 72 feet on the ledge with good indications-showing ore in bunches. Work is being stendily

RAYMOND EXTENSION. This mine is situated near the Portsmouth. Incline down 40 feet; some ore. Working one shift.

ANDES. In the same locality as the Raymond

Extension and Portamouth; incline down 55 feet and showing a well defined ledge with bunches of ore. Driving ahead all the time. The drift from the main shaft is not

in 235 feet without cutting the ledge. From the 164 foot level rich ore is being constantly extracted. The vein at this point is two feet wide, a portion of which, however, is not considered rich enough to mill at present. MAZEPPA.

The hoisting works are nearly com-pleted, and if nothing unexpected takes place to prevent it, another whistle will be added to our noisy steam choir on Monday next. The works are first class in every respect. Sinking on the main shaft will be resumed as soon as the hoisting works are ready.

Everything here is on such a stupendous scale that unless the vein gave out
everywhere, or became in a day fabulously rich in every part, it would be
difficult to much change it in the limits
of a Mining Review. The usual amount
of ore is being extracted, and shipped
with the same uniformly good returns in
shape of bullion. Work on the new RAYMOND AND ELY. shape of bulion. Work on the new 80-horse power engine is progressing as fast as is consistent with the nature of the work, and all other outside work is going rapidly forward.

PARIAN. The shaft, or incline, on the ledge is down one hundred feet, with a drift from the bottom of thirty feet, showing good mineral all the way. Work, which has been suspended on this mine for some time, will soon be renewed.

PEAVINE. Still shipping ore from this mine. The usual number of men employed and character of ores unchanged. We have ne extraordinarily rich ore from this mine lately.

Incline shaft 200 feet deep. Ledge in the bottom between 8 and 9 feet wide, two feet of which is extremely rich, the balance being low grade ore of good two feet of which is extremely fuch, the balance being low grade ore of good milling quality. The rich streak is steadily increasing in size as depth is attained. Five or six tons of high grade ore on the dump, and fifteen to twenty tons low grade. Still sinking.

NORTH STAR. This new and promising mine is now dow 15 feet in the shaft. The vein holds its width and richness.

WASHINGTON AND CREOLE

working about 40 men. Another winze is being sank, from which drifts are being run east and west, the ledge averaging two feet in width from top to bottom. In stoping up from the drift to the ledge, the average width in the stopes is about three feet. This stope is 70 feet long-running east and west from the main drift. Prospecting for new developments is going on as heretofore. The outlook of this mine was never better than at present. The June shipment will be at least \$30,000.

SILVER CHIEF, MONARCH AND TIGER MINES. On the Silver Chief, the oldest in lo-cation of this group of mines, considera-ble work has been done. The first shaft and incline was sunk in ore about thirty-five feet, some of which assayed very high. A working shaft has been sunk 105 feet, and a drift run 30 feet to cut 105 feet, and a drift run 30 feet to cut the ledge, which, however, it has not yet resched. This group of mines is situ-ated close to the Bulliouville road, be-youd the Alps, and a little below the famous Condor mine, and when work is resumed, as we learn in shortly will be, we look for something pretty good.

the mine, we learn that they are working about the same number of men as last week. Have raised from the 150 foot level—Wright's shaft—50 feet, and intend to drift therefrom to connect with the Chief of the Hul East. Before maktime, and that our shipments of bullion are a practical endorsement of our assertions, that does not admit of dispute.

The greatly improved facilities for the transportation of ores from the mines to shaft will be timbered throughout by to-morrow night—210 feet below the level of the tunnel. This shaft is 8x4 in the clear—two compartments—can raise 30 car loads in 24 hours. Are now working 27 men. Expect to commence sinking again during the present week.

SILVER PEAK. Quite a decided improvement is noticeable in this mine since our last report. The ore struck in the vein in the stopes is wider and richer than ever before. In one of the ore breasts this streak is three one of the ore breasts this streak is three feet wide—good milling ore, evidently much better than the last that was sent to the mill. The grading for the new hoisting works is progressing well, and it is expected will be completed next week. The machinery was to have left San Francisco on the 19th inst, but Superintendent Nelson has, as yet, no advices of its shipment. The contract with the Pacific Iron Works demanded that the work should be compensed on that the work should be commenced on or before the 10th of June, and com-pleted and shipped on or before the 19th.

BOWERY. Still working on ore from the recent strike. Expected to commence crushing this week, but have determined to defer it till the 1st prox. All the drifts look-ing exceedingly well.

PORTLAND. Have been hoisting ore since Wednesday last. The ore averages \$100 to the ton. The vein in the stopes is maintaining its size and quality everywhere.

PIOCHE. Working the usual number of hands, working the usual number of hands, and taking out ore faster, perhaps, than at any previous time in the history of the mine. Will resume delivering ore at the Amador mill about the 1st of July. The new shaft is now 69 feet deep and making good headway, the ground continuing favorable. CONDOR.

Work is still suspended on this mine Work is still suspended of this little.

Why, we cannot conceive, for a more promising mine while work was prosecuted on the ledge was probably never struck in Ely District. We hope to see renewed activity in this quarter soon. PUDDY.

been stripped for upwards of one hun-dred feet, showing ore all the way. To our experienced eye it looked like a very fair quality of surface ore. Fifteen hun-dred feet located.

BROOKLYN

Shipping \$5,000 per day. Have bought the Ivanhoe engine—capacity, 12 inch cylinder, 18 inch stroke. Raising about 36 tons daily.

SPRING MOUNTAIN TUNNEL. No change worthy of notice. CHIEF EAST.

Still drifting east, and shows some very fine ore in the drift. STRATTON. Work suspended for the present,

PIOCHE PHENIX. Superintendent Hardy informs us that he expects to resume work in this mine

some time this week. ALADDIN.

Sinking and drifting, with excellent No particular change to prospects.

> Bristol District. SULTAN MINE.

The Sultan mine is located near the foot of what is known as the Blue Hill, foot of what is known as the Blue Hill, about five miles from the smelting furnace of the National Mining Company. The outeroppings of the ledge, which are very large, and contain heavy masses of mineral, run in a northerly and southerly course, dipping to the northeast. It was discovered in 1871, by C. W. Roeden, and two shafts were sunk on it—about twelve feet deep. On commencing to sink, limestone, the country rock at that point, was encountered; but at a to sink, imestone, the country rock at that point, was encountered; but at a depth of six feet a body of ore was struck fully eight feet in width. Work was resumed about two and a half months ago, and an incline sunk on the ledge between sixty and seventy feet, ore all the way—in the bottom it is all ore—the hanging wall has been followed down the way—in the bottom it is all ore—the hanging wall has been followed down, but there is no foot wall in sight, so the width of the vein is yet unknown. The character of the ores is varied—both free willing ores and heavy galens and carbonates. There are 100 tons of ore on the dump. It also maintains the reputation of Bristol district as the district par avcellence, of beautiful specimens. tation of Bristol district as the district par excellence, of beautiful specimens. Mr. Sultan showed us ore delicately frosted with crystals, tinted with all the colors of the rainbow, that was really exquisite. Eleven assays gave an aver-of \$130 to the ton. Working four men and expect to increase the force at an early day. Principal owners Jacobs and Sultan and C. W. Roeden. To Mr. Louis Sultan, we are indebted for the foregoing facts. foregoing facts.

This mine is situated about seven miles this side of Bristol, and owned by Messrs. Smith, Brown and Stewart. Discovered in 1871; prospected a little; then laid idle till last fall, when its owners went vigorously to work to develop it. It has been opened by a shaft and tunnel about eighteen feet, and shows a Shipped last week \$6,300—next week will, as we are assured, shipbetween \$6,000 and \$7,000—shipments will hereafter be made weekly. They are now taking out about 10 tons a day—an average sstons of ore on the dump. Mr. Ordway,

CHIEFTAIN.

manager of the National Smelting Works offered \$20 a ton for it on the dump, but was refused. We gather these items from Mr. Brown.

BULLION. Discovered and located about the same time as the Chieftain, from which it is not very far distant. A mine of similar character and extent. It belongs

This is one of the oldest locations in Bristol district. A tunnel has been run in on the vein 225 feet, in ore all the way—and when we say, in ore, we mean that the top and bottom and sides are all ore—no wall or country rock being wissible anywhere, and one cross-cut of twenty-seven feet, also showing ore. No stoping has been done; but in doing this amount of work, over 650 tons of ore have been taking out. Five hundred tons of this have been smelted at the works of the National Mining Company, yielding \$80 to the ton in silver, and CAVE MINE-HERCULES COMPANY. yielding \$80 to the ton in silver, and 17 to 18 per cent, of lead. There are now about 150 tons of high grade ore on the dump. The ore is a carbonate of lead. In running the tunnel a cave was struck CHIEF OF THE HILL.

From Mr. Thomas Cook, foreman of to five fest high, which extended in, large enough for a man to crawl through, over one hundred feet, greatly facilitating the progress of driving the work. Mr. Roe, the superintendent, and a large owner in the mine, who gives us the above details, says he has just resumed

Highland District.

J. N. Williams, Superintendent of the Highland Consolidated Mill and Mining Company's mines thus discourses of the Mendha mill: "I called at the Mendha mill and found everything working to a charm. An experimental charge of 3,000 pounds from one of the company's ledges was worked while I was there, and yielded 72 and 4-10 per cent., producing a silver bar weighing two pounds—978 fine. This ore was worked without wasting, and so well are Professor Mathey and Mr. E. M. Riotte pleased with the result, that they propose to dispense with the use of their costly Stedefeit furnace for the future; believing the result from crushing the ore raw will be more economical." Of the mines belonging to the Highland Consolidated Mill and Mining Co., Mr. Williams says the ing Co., Mr. Williams says the HAMBURG

Has the main shaft down 43 feet, show ing a ledge fully two and one-half feet in width. Within the last few days it has width. Within the last few days it has widened considerably, and is still improving in size and quality. We saw some of the ore, and as far as our judgment goes, it will be hard to beat.

GEORGIA. On this mine a tunnel has been run 85 feet on the ledge, showing good ore all the way, and from the lay of the croppings on the surface, which for 1,000 feet show rich ore throughout, it is believed that 80 feet more will reach the main chimney of the ore. The ledge averages about two feet in width.

NEVADA CENTRAL RAILBOAD. - This will run as usual. railway, which places Pioche in close row will commence running on schedule time, and will make two trips daily. The train will consist of fifteen ore cars, each carrying five tons, with one passenger car attached. The Col. Carter is a 15-ton cagine, with a 6-wheel driver, 12-inch cylinder and 16-inch stroke. Du-This rather unromantically named mine was discovered some two weeks ago by Frank Radish. It is on the divide above the Raymond & Ely mine, such above the Raymond & Ely mine, to the west of where the road crosses it. A ledge three and a half feet wide has the result of lar time will be made. With railroad communication to Bullionville that village will doubtless become a popular place of resort, besides affording the people of Pioche an opportunity to take a jaunt to the country as a means of relaxation from the cares of business. We shall take the second or the country as a means of the care of the care

lionville is now quite an important town, with good future prospects. The two Raymond & Elymills—twenty and thirty stamps respectively—are running on full time, crushing ores from the Raymond & Ely mine; Tom McMasters is the Suat Lymine; for McMasters is the Su-perintendent. The Magnet mills—five and twenty stamps each—are owned by Col. W. H. Raymond, and are running on third-class ores from the Raymond & Elymine; A. L. Barber is the Superin-tendent. The Chicago is a 20-stamp mill, in charge of Mr. Moore, and is run-ning on tailines. ning on tailings.

RAILEOAD FOUNDRY .- Ney Churchman is the Superintend at of the Railroad work for the railroad and for the quartz mills at Bullionville. At the foundry has just been finished an order for four pan

RAYMOND & ELY VS. HERMES.—The ardies, weighing 1,000 pounds each. Or-ders have also been received at the foun-dry from nearly all the mills for shoes and dies. A planing machine, bed 7x3 feet, has been added to the machine shop. The Railroad Foundry is an important auxiliary to the various mining and milling enterprises in this and adjoining dis-tricts and to the railroad itself. Among its employes are some of the most experi-enced and ablest machinists on the Pacific coast. It affords employment to a large number of laborers in its different departments.

CLOVER VALLEY.-This is an old Mormon settlement, about 40 miles from Pioche. There are some dozen or more families in the valley, which is well adapted to grazing and stock raising. The valley is quite small, being only about three miles long and from one to three-quarters of a mile wide. Deputy Surveyor Henry made a survey of the entire land recently, and from that gen-tleman we learn these particulars. Sherwood's original saw mills are ten miles beyond, and the lumber from that mill is The valley is very well watered, and has the advantage of a delightful climate.

FUNDS FOR THE FOURTH.—The Finance Committee on Fourth of July Celebration called on many of our people yesterday and the day before to solicit funds for the appropriate celebration of the approaching national anni-tion of the approaching national anni-versary. The Committee were quite suc-cessful. There is no doubt that the Committee will succeed in raising all the money necessary for a celebration which will reflect credit upon the liberality and patriotic ardor of our citizens. The Committee will call upon citizens to-morrow.

CHARLEY WIEDERHOLD has again placed us under obligations for a supply of Sunday reading, including both news-papers and pictorials. Wiederhold's is the place to obtain good Sunday reading

SHOULD BE DISCONTINUED .- McCannon street is the location of many private residences. Therefore, it, of all others, should be kept cleanly; but it is the cus tom of many residents on that street, who ought to know better, to throw the beef bones, old hams and pieces of pork into the street. This is probably owing into the street. This is probably owing to thoughtlessness more than anything else, and we hope that by calling their attention to the matter those who convert this thoroughfare to such uses will see the error of their ways and desist. As it is, the street is in anything else than in a proper condition, considering that ladies are frequently called upon to pass through that thoroughfare.

to its utmost capacity, and it is a source of gratification to us to say that the large audience in attendance were more than pleased with the evening's enterpressed with the evening's enter-tainment. We regret that an unusual pressure of business prevented us from witnessing the entire entertainment. Monday evening will be presented the laughable comedy of the "Serious Fami-iy," to be followed by the farce of "Our Gal." AND CIGARS

IMPORTED Plows .- W. C. Glissan received yesterday, per Wells Fargo & Co.'s Express, two iron plows, which are new in this part of the country, and are to be an this part of the country, and are to be used in breaking new ground in Rose Valley, twelve miles distant. These plows were manufactured near Borresokane, County Tipperary, Ireland. They are made of wrought iron entirely, excepting the mould board and bottom plate, which are east iron, there being no wood in their construction. wood in their construction.

SANDSNONE .- A species of white sandstone has been discovered in Bristol Dis- READING AND CLUB ROOMS trict, which appears to excel anything yet found for the lining of furnaces. It is found in great quantities, and it is no idle prediction to say that it will be used extensively in the construction of fur naces, thus supplying a want much felt and at the same time proving a source of wealth. One superlative quality of this sandstone is that when it cools it does not crack.

SALE OF SADDLE AND BUGGY HORSES. A rare opportunity to purchase fine saddle and buggy horses is offered by S. C. Barnes, of the Dexter Stables, Mendow Valley street. The horses will be in Boone & Dolman's corral to-day. The time is short, and those desiring to purchase should apply without delay, as the horses not sold to-day will be

ACCIDENT TO THE RAILBOAD.-A slight accident occurred yesterday to the engine Colonel Carter on the Nevada Central Railroad. The pin came out of the cross-head; the piston then became loose and run through the cyl.nder, knocking out both heads. This will prevent the putting on of the passenger train for a few days. In the mean time ore cars

Goods Received .- The enterprising communication with Bullionville, and firm of Jacobs & Sultan yestesday rewhich bids fair during the present year ceived four wagon loads of goods, and which bids fair during the present year to form a connection with the Utah Southern, and thus give our flourishing mining district railroad outlet to Salt Lake and all points east and west, is now in complete running order, and to-morrow will commence running on schedule demand for goods in their line. LAYING WATER PIPES .-- The Floral Springs Water Company were yesterday

engaged in laying water pipes through Meadow Valley street. By Monday pipes will be laid as far as the divide, at the head of that street. A hydrant has been constructed near the Pioche hoisting COLONEL DAVIS, a gentleman well and favorably known in this community, leaves this morning for San Francisco, via Salt Sake. He will be absent some weeks, in the hopes of restoring his vigor, and then will return to Pioche to resume the active duties of his life here.

The winze from the first level is now forty-five feet deep, and the ledge continues to improve. We saw some excellent rock from it lately. The air is becoming bad, and work will have to be suspended until a blower and pipe is procured.

MILLS AT BULLIONVILLE.—Owing to the erection of several quartz mills, employing a large number of men to run ploying a large number of teams them, together with the number of teams them, together with the number of teams them, together with the number of teams them together with the number of teams to meet this eventure and the place Club Rooms. A puncture at the place Club Rooms are to meet this eventure at the place Club Rooms. The results are to meet this eventure at the place Club Rooms are together with the number of teams them.

ern Nevada, and in to-day's paper advertises a complete assortment of goods in his line. If anybody wants anything which can be purchased anywhere, let him go to Ashim's Main street, opposite

Masonic Ball.-Tuesday evening is the time and Brown's Hall the place selected for the Masonic ball. From the ample preparations made, we are assured that those who attend will have a pleasant time.

AL. DOLLIFF leavas to-day for his old home, away down in the State of Maine. Foundry, Bullionville. It is engaged in Al. is an old stand-by in Pioche, and his many friends join us in hearty wishes for his safe return. He will be absent only

gument in this case, on motion for a new Perley arguing against the motion. The argument will be continued to-morrow bottee.

1 S FURNISHING A SUPERIOR ARTICLE OF Lager Beer, in quantities to sait, at the low-cut rates. Adjoining camps supplied on short juice. BASE BALL.—There will be a game of

base ball at 1 o'clock this afternoon, near Boone & Dolman's corral. A picked nine will contest against the field. Rose Valley.-We are informed by

Mr. Glissan that the bay crop in Rose Valley this year is very heavy. The heat there on Friday was excessive. To ARRIVE.—The following passengers left Hamilton yesterday for Pioche: J.

Meyer, Peter Greist, A. Felt, Mrs. Kent, N. Crist and F. Tagliabue. SERVICES AT THE EPISCOPAL CHURCH. Morning service at eleven o'clock; Sun-dayschool at 2 p. m., and evening service at eight. Henry L. Badger, rector.

O. D. Gass, an old settler in the Sagebrush State, is now in Pioche. We hope to have the pleasure of meeting him. Bullion.—The shipment of bullion the past week was \$56,022.54—not up to the average.

LEFT PALISADE yesterday : J. B. Hitchcock, Nicholas Cass, Mrs. Gen. George Hinds and Thos. Robinson. Mr. Kerner and wife left Palisade or the 21st for this city.

CHICKENS always on hand and for sale
